Education

Sharda University — Noida, India
Master of Computer Applications — *Sep. 2024 – Aug 2026*

GL Bajaj Institute of Technology — Noida, India
Bachelor of Computer Applications — *Nov. 2020 – July 2023*

Projects

Portfolio Website | *React, Vite, CSS, GitHub Actions* — Live | Code
- Built my personal portfolio with React and Vite using reusable components, with all projects kept in one data file
- Added dark and light mode using useState, useEffect and CSS variables, saved in localStorage
- Set up a GitHub Actions workflow that builds and deploys the site to GitHub Pages on every push

Anime Finder | *HTML, Bootstrap, JavaScript, GraphQL API* — Live | Code
- Built an anime search app using the AniList GraphQL API with Trending, Top Rated, Popular and Upcoming lists
- Added search, genre filter, load more and a details popup with synopsis, studio, episodes and trailer
- Created a My List feature with Watching, Plan to Watch and Completed status saved in localStorage
- Designed a responsive dark UI with Bootstrap 5 that works on mobile

Country Explorer | *HTML, CSS, JavaScript, REST API* — Live | Code
- Built an app to explore 250 countries with search, region filter and sorting by name, population or area
- Combined a country dataset with the World Bank population API into one list using async/await
- Made a flag and capital quiz with random questions, score, streak and best score saved in localStorage

Pokédex | *HTML, CSS, JavaScript, PokéAPI* — Code
- Built a Pokédex for all 1025 Pokémon with search by name or number and filter by type
- Loaded Pokémon in batches with Promise.all and a load more button to keep the page fast
- Created a details popup with base stats, description, cry sound, shiny version and keyboard navigation

Weather App | *HTML, CSS, JavaScript, Open-Meteo API* — Code
- Built a weather app showing current temperature, humidity, wind and a 5 day forecast for any city
- Added a use my location option with the Geolocation API and saved the last searched city

To-Do List | *HTML, CSS, JavaScript* — Code
- Built a to-do app to add, edit, delete and complete tasks with All, Active and Completed filters
- Added dark mode and saved tasks and theme in localStorage so they stay after refresh

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS
Frameworks: React, Next.js, Redux Toolkit, React Query, React Router
Styling: Tailwind CSS, Bootstrap, Material UI, Sass, Responsive Design
Backend: Node.js, Express, MongoDB, SQL, REST APIs, GraphQL
Tools: Git, GitHub, Vite, Jest, Figma, Vercel

Certifications

Data Analyst Certification | *ICT Academy & Honeywell*
- Completed training in data analysis, visualization, and reporting techniques
- Worked with Excel, SQL, and Python for interpreting datasets

Python Programming Certification | *Barclays*
- Learned core Python concepts including data structures, functions, and OOP
- Built small applications to strengthen logical and problem-solving skills

C & C++ Programming Certification | *Barclays*
- Developed a strong foundation in procedural and object-oriented programming
- Practiced pointers, memory management, and basic algorithms
